

MUHAMMAD IBRAR

MERN / MEAN Stack Developer | 4 Years Experience

MongoDB • Express.js • React.js / Angular • Node.js
+92 302 813 1491 • ibrarUIdesigner@gmail.com • [Portfolio](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-stack JavaScript developer with 3 years of experience building end-to-end web applications across the MERN and MEAN stacks. Proficient in crafting RESTful APIs with Node.js and Express.js, designing and managing MongoDB and SQL databases, and delivering responsive, component-driven frontends in React.js and Angular. Experienced in state management, JWT authentication, third-party API integrations, and deploying scalable applications. Comfortable owning both the frontend and backend of a feature — from database schema to polished UI — in collaborative, Agile team environments.

STACK OVERVIEW

MERN Stack

MongoDB • Express.js • React.js • Node.js

MEAN Stack

MongoDB • Express.js • Angular • Node.js

TECHNICAL SKILLS

Frontend	React.js, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
Backend	Node.js, Express.js, REST API Design, Middleware, MVC Architecture
Databases	MongoDB (Mongoose ODM), MySQL, PostgreSQL — Schema Design, Aggregations, Indexing
State Management	Redux, Redux Toolkit, Context API, NgRx (Angular)
Auth & Security	JWT, bcrypt, Role-Based Access Control, Input Validation, CORS, dotenv
API & Integration	REST APIs, Axios, HTTP Client, Webhooks, Third-party API Integration, Postman
Dev Tools	Git, GitHub, npm, VS Code, Postman, Nodemon, Chrome DevTools, Figma
Soft Skills	Agile/Scrum, Code Reviews, Technical Documentation, Cross-team Collaboration

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Python, FastAPI, React)

2024 – 2026

LexumSoft | Remote

- ▶ Designed and developed secure, scalable web applications using Python (FastAPI) and React, focusing on performance, maintainability, and clean architecture.
- ▶ Developed AI-powered solutions including call agents and intelligent automation agents to streamline business processes and enhance user interaction.
- ▶ Integrated backend services with modern frontend applications, ensuring seamless API communication and efficient data handling.

MERN / MEAN Stack Developer

2021 – 2024

Deazitech | Lahore, Pakistan — On-site

- ▶ Designed and developed full-stack web applications end-to-end using the MERN stack (MongoDB, Express.js, React.js, Node.js) and MEAN stack (MongoDB, Express.js, Angular, Node.js) depending on project requirements.
- ▶ Built and maintained scalable RESTful APIs with Express.js — handling authentication, CRUD operations, file uploads, filtering, pagination, and complex data queries.
- ▶ Developed dynamic, component-driven frontends in React.js and Angular with clean separation of concerns, reusable component libraries, and responsive layouts using Tailwind CSS and Bootstrap.
- ▶ Implemented state management using Redux and Redux Toolkit in React projects, and NgRx and Context API in Angular applications to manage complex shared application state.
- ▶ Designed MongoDB database schemas using Mongoose ODM including references, population, schema validation, and aggregation pipelines for reporting and analytics features.
- ▶ Integrated JWT-based authentication and authorization — including protected routes, role-based access control, and token refresh logic — across multiple full-stack applications.
- ▶ Integrated third-party APIs including payment gateways, email/SMS services, Google Maps, and social login providers into both frontend and backend layers.
- ▶ Managed relational data in MySQL and PostgreSQL using normalized schemas, complex joins, and indexed queries to support performance-critical features.
- ▶ Collaborated with UI/UX designers to convert Figma prototypes into pixel-perfect, fully responsive interfaces, ensuring high design fidelity across all screen sizes.
- ▶ Participated in Agile sprints — contributing to backlog grooming, sprint planning, daily stand-ups, and retrospectives — ensuring consistent, on-time feature delivery.
- ▶ Conducted code reviews and mentored junior developers on best practices in JavaScript, component design, and API structure.
- ▶ Maintained Postman API documentation collections used by frontend, QA, and stakeholder teams to understand and test backend endpoints.

Senior Website Designer & Junior Developer

2018 – 2021

TechNDevs | On-site

- ▶ Converted PSD and Figma designs into fully responsive, cross-browser-compatible HTML/CSS/Bootstrap websites for 50+ client projects.
- ▶ Wrote JavaScript and jQuery logic for interactive UI components — form validation, sliders, modals, tabs, and dynamic content rendering.
- ▶ Built foundational skills in frontend development, version control (Git), and client-facing project delivery that became core to later full-stack work.

NOTABLE PROJECTS

-
- ▶ **Full-Stack SaaS Dashboard (MERN):** Built a complete SaaS application with React.js frontend, Node.js/Express.js API, MongoDB database, JWT authentication, role-based dashboards, and real-time data visualization.
 - ▶ **E-Commerce Platform (MEAN):** Developed an Angular-based e-commerce storefront with product catalog, cart, checkout flow, order management, and an Express.js/MongoDB backend API.
 - ▶ **Location-Based App (MERN + Google Maps):** Integrated Google Maps API into a React.js application with real-time geolocation, custom markers, and a Node.js backend serving location data from MongoDB.

- ▶ Multi-Role Admin Panel (MEAN): Built an Angular admin panel with NgRx state management, role-based route guards, dynamic data tables, and a full Express.js REST API with MySQL backend.
- ▶ Authentication Microservice: Designed a standalone Node.js/Express.js auth service with JWT, bcrypt, email verification, password reset, and refresh token rotation — reusable across multiple projects.
- ▶ Reporting & Analytics Module: Created MongoDB aggregation pipelines feeding a React.js chart dashboard, replacing manual reporting with real-time business intelligence views.

EDUCATION

Bachelor's Degree — Computer Science / Information Technology

Relevant: Data Structures, Algorithms, Database Systems, Web Technologies, Software Engineering

ADDITIONAL INFORMATION

- ▶ Languages: English (Professional), Urdu (Native)
- ▶ Comfortable in both frontend-heavy and backend-heavy project assignments within a full-stack scope.
- ▶ Open to full-time, remote, hybrid, or on-site full-stack / MERN / MEAN developer roles.
- ▶ Portfolio with live projects: ibrardevportfolio.netlify.app
